

Correlation sensor

Correlation sensor

Product features

1. size: 32mm(length) *11mm(width)*20mm(height)
2. the main chip: LM393, the opposite type infrared head
3. working voltage: 5V DC
4. with signal output indicator.
- 2, single signal output.
- 3, the effective output signal is of low level.
- 4, the sensitivity is not adjustable.
- 5, can be used for workpiece count, motor speed measurement....
6. circuit board output switch value!
